

Dr P R Mishra received his PhD in number theory from Banaras Hindu University (BHU). He joined DRDO in 2003 at System Analysis Group (SAG). Since then he has been primarily involved in security analysis of crypto-algorithms. He has over 15 years of experience of working in cryptology.

His main areas of interest are algebra, number theory, analysis of stream ciphers, cryptographic properties of permutations and Boolean functions and finite fields.

He has been reviewer and program committee member of prestigious conferences. Currently he is working as scientist 'E' in SAG. He has authored several research papers in international conferences and journals.
